DISCUSSION PAPER
Call for Motions

13 – 16 JUNE 2023

NATIONAL CONVENTION CENTRE
CANBERRA

The Australian Local Government Association (ALGA) is pleased to convene the 29th National General Assembly of Local Government (NGA), to be held in Canberra 13 - 16 June 2023.

This discussion paper contains essential information for Australian councils considering submitting motions for debate at the 2023 NGA.

It is recommended that all councils and delegates intending to attend this event familiarise themselves with the guidelines for motions contained in this paper.

Key Dates

24 March 2023 Acceptance of Motions	13 June 2023 Regional Cooperation & Development Forum	14 - 15 June 2023 National General Assembly	16 June 2023 Australian Council of Local Government
---	---	---	---

**To submit your motion,
visit: alga.com.au**

Background to ALGA and the NGA

ALGA was established in 1947, and its structure is a federation of member state and territory local government associations.

Its mission is to champion and strengthen Australian councils by representing the agreed position of ALGA members, the seven local government associations from around Australia, who represent 537 Australian councils.

In 1994, the ALGA Board, in consultation with its member associations, established the NGA as a unique forum to engage with councils directly at the national level.

The purpose of the NGA was to build the profile of local government on the national stage and demonstrate to the Australian Government the strength and value of working with local government nationally.

As part of the NGA, debate on motions was introduced as a vehicle for councils from across the nation to canvas ideas, and solutions to the challenges facing Australia's councils and communities.

Outcomes of debate on motions (NGA Resolutions) could then be used by participating councils to inform their own policies and priorities, as well as their own advocacy to the Federal Government and Federal MPs.

At the same time, they assist ALGA, and its member state and territory associations to gain valuable insight into council priorities, emerging national issues, and gauge the level of need and support for emerging policy and program initiatives and advocacy.

Changes for 2023

The ALGA Board has undertaken a comprehensive review of the motions process.

As a result, ALGA has allocated additional time for debate on motions at the 2023 NGA and amended the criteria with a view to improving the quality and relevance of motions included in the Business Papers.

The updated criteria for motions is listed on page 6.

ALGA's policies and priorities will continue to be informed by motions and determined by the ALGA Board and based on the positions of its member associations.

ALGA's Board thanks all councils for attending the NGA, and those that will take the time to submit motions for debate at this event.

Submitting Motions

The theme of the 2023 NGA: Our Communities, Our Future.

This theme conveys the critical importance of our communities, how they are the focus of our attention, and how they are at the centre of all our work.

Our communities are the reason that local governments exist, and it is the health and wellbeing of our communities that will shape Australia's future.

This discussion paper is a call for councils to submit motions for debate at the 2023 NGA, to be held in Canberra 13 – 16 June 2023.

A notice of motion to this year's NGA should either:

- Focus on practical and deliverable programs and policies that the Australian Government can support and work directly with the local government sector to build our communities; or
- New program ideas that would help the local government sector to deliver national objectives.

Motions should be concise, practical and able to be implemented.

They must also meet the guidelines for motions outlined in this paper.

You are encouraged to read all the sections of the paper but are not expected to respond to every issue or question. Your council's motion/s should address one or more of the issues identified in the discussion paper.

Motions must be lodged electronically using the online form available at www.alga.com.au and be received no later than 11:59pm on Friday 24 March 2023.

All notices of motions will be reviewed by the NGA Subcommittee to ensure that they meet the criteria included in this paper.

The Subcommittee reserves the right to select, edit or amend notices of motions to facilitate the efficient and effective management of debate on motions at the NGA.

All NGA resolutions will be published on www.nationalgeneralassembly.com.au.

As the convenor of the NGA, the ALGA Board will communicate resolutions to the relevant Australian Government Minister and publish Ministerial responses as they are received on this website.

If your council does submit a motion, there is an expectation that a council representative will be present at the NGA to move and speak to that motion if required.

We look forward to hearing from you and seeing you at the 2023 NGA.

Criteria for motions

To be eligible for inclusion in the NGA Business Papers, and subsequent debate on the floor of the NGA, motions must meet the following criteria:

1. Be relevant to the work of local government nationally.
2. Not be focused on a specific jurisdiction, location or region – unless the project or issue has national implications.
3. Be consistent with the themes of the NGA.
4. Complement or build on the policy objectives of ALGA and your state or territory local government association.
5. Be submitted by a council which is a financial member of their state or territory local government association.
6. Propose a clear action and outcome ie call on the Australian Government to act on something.
7. Not be advanced on behalf of external third parties that may seek to use the NGA to apply pressure to Board members, or to gain national political exposure for positions that are not directly relevant to the work of, or in the national interests of, local government.
8. Address issues that will directly improve the capacity of local government to deliver services and infrastructure for the benefit of all Australian communities.
9. Not seek to advance an outcome that would result in a benefit to one group of councils to the detriment of another.
10. Be supported by sufficient evidence to support the outcome being sought and demonstrate the relevance and significance of the matter to local government nationally.

Motions must commence with the following wording:

This National General Assembly calls on the Australian Government to ...

Other things to consider

Please note that it is important to complete the background section on the form. Submitters of motions should not assume that NGA delegates will have background knowledge of the proposal.

The background section helps all delegates, including those with no previous knowledge of the issue, in their consideration of the motion.

Motions should not be prescriptive in directing how the matter should be pursued.

Try to keep motions practical, focussed, relatively simple and capable of being implemented to ensure that relevant Australian Government Ministers provide considered, thoughtful and timely responses.

Multi-point motions that require cross portfolio coordination have not historically received meaningful responses from the Government.

All motions submitted will be reviewed by the NGA Subcommittee, in consultation with state and territory local government associations, to determine their eligibility for inclusion in the NGA Business Papers.

When reviewing motions, the Subcommittee will consider the motions criteria, clarity of the motion and the importance and relevance of the issue to local government.

If there are any questions about the substance or intent of a motion, ALGA will raise these with the nominated contact officer. With the agreement of the submitting council, these motions may be edited before inclusion in the NGA Business Papers.

To ensure an efficient and effective debate where there are numerous motions on a similar issue, the Subcommittee will group motions together under an overarching strategic motion.

The strategic motions will have either been drafted by ALGA or will be based on a motion submitted by a council which best summarises the subject matter.

Debate will occur in accordance with the rules for debate on motions published in the Business Papers and will focus on the strategic motions.

Associated sub-motions will be debated by exception only or in accordance with the debating rules.

Any motion deemed to be primarily concerned with local or state issues will be referred to the relevant state or territory local government association and will not be included in the NGA Business Papers.

Motions should be lodged electronically using the online form available on the NGA website at: www.alga.com.au.

All motions require, among other things, a contact officer, a clear national objective, a summary of the key arguments in support of the motion, and endorsement of your council.

> **Motions should be received no later than 11:59pm on Friday 24 March 2023.**

Setting the scene

‘Through a devastating pandemic, through a succession of dangerous and damaging natural disasters, through global uncertainty and painful price rises – The Australian people have demonstrated the best of our national character. Resolute and resilient in hard times. Practical and pragmatic about the challenges we confront. Optimistic and confident in a better future. And ready to work together to build it.’

The Hon Jim Chalmer MP, Federal Treasurer Budget Speech 2022–23

The opening statement of the Federal Treasurer’s first Budget Speech describes the backdrop against which the 2023 NGA will be held.

The 2022 NGA was held just weeks after the change in the Federal Government on 21 May 2022. On 25 October 2022, the new Government handed down its first Budget which updated the economic outlook, realigned priorities and outlined how the Government was to meet its election promises.

The Budget update foreshadows deteriorating economic conditions, citing global challenges, slowing growth, high inflation and higher interest rates, and acknowledges the mounting cost of living pressures on individuals, families and communities.

Key updates include:

- The economy is expected to grow solidly this financial year, by 3 ¼ percent – before slowing to 1 ½ percent growth for 2023/24, a full percentage point lower than what was forecast in March;
- That slowing growth will have an effect on employment, but jobs will continue to be created, and unemployment is expected to stay low by historical standards – at 4 ½ percent in 2023/24 and 2024/25;
- Inflation is expected to peak at 7 ¾ percent late in 2022, before moderating over time to 3 ½ percent through 2023/24, and returning to the Reserve Bank’s target range in 2024/25; and that
- When that inflation moderates, real wages are expected to start growing again in 2024.

The Government is also committed to repairing the Budget in a ‘measured and responsible’ manner consistent with the objective of maintaining full employment and the delivery of essential services. It foreshadows that this will be achieved through spending restraint, with new spending focused on high-quality and targeted investments and building on the capability of the Australian people, expanding the productive capacity of the economy, and supporting action on climate change.

The Budget also included a focus on measuring and improving community wellbeing.

By the time of the 2023 NGA, the Government will have delivered its second Budget, which will provide further updates to the economic outlook and also refine its economic strategy going forward.

The 2023 NGA provides you – the elected representatives of Australia’s local councils and communities – with the opportunity to engage with the Federal Government and key Ministers.

Further, it is your opportunity to advocate for new or extended programs and policy initiatives that could strengthen local governments’ capacity to deliver services and infrastructure to communities across the nation.

This year’s call for motions focusses on eight priority areas:

- Productivity;
- Local Government Infrastructure;
- Community Wellbeing;
- Local Government Workforce;
- Data, Digital Technology and Cyber Security;
- Climate Change and Renewable Energy;
- Natural Disasters; and
- Housing.

1. Productivity

In February 2022, the then Federal Treasurer asked the Productivity Commission to undertake an inquiry into Australia’s productivity performance and provide recommendations on productivity enhancing reform.

This inquiry was the second of a regular series, undertaken at five-yearly intervals, and recognises that productivity growth is vital for Australia’s future. Drawing on the Intergenerational Report the Treasurer notes that ‘... future growth in income and living standards will be driven from productivity growth as the participation effects of young migration are offset by an ageing population.’

ALGA engaged SGS Economics and Planning to undertake research to support its submissions to this inquiry.

SGS Principal and Partner Dr Marcus Spiller presented on some of the findings of this research at the 2022 NGA. In his presentation he identified that local governments generate local economic activity through employment, payment of wages and expenditure on goods and services in the local economy. In addition, SGS identified nine ways local government supports the productive capacity of the broader economy.

Figure 1 – Nine ways local governments contribute to the productive capacity of the broader economy:

Sources: Adapted from SGS Research for ALGA’s Submission to Productivity Commission (2022)

Are there programs and initiatives that the Commonwealth Government could implement to improve local government’s capacity to support productivity growth?

Are there programs that could support one, or all of the identified ways local government contributes to productivity in the broader economy?

2. Local Government Infrastructure

The 2021 National State of the Assets Report (NSoA) shone a spotlight on local government infrastructure assets. While the technical report shows that local government assets such as roads, bridges, buildings, parks and recreation, stormwater, water and wastewater and airports and aerodromes are generally in good to very good condition, around 10 percent are not fit for purpose, and around 20 - 25 percent are only fair and over time will need attention.

Over the past 12 months this situation has further deteriorated as a result of natural disasters, and particularly flooding across the eastern seaboard.

The technical report shows that in 2019/20 non-financial infrastructure assets were valued at \$342 billion and were depreciating at \$7.7 billion per year. Replacement costs of these infrastructure assets were in the order of \$533 billion.

While 86 percent of councils have adopted long term financial plans, one third of councils do not have asset management plans for their major assets, or if they do, they are out-of-date. Of the councils that do have asset management plans only 66 percent included financial projections in their financial plan.

Asset management and long-term financial planning are essential tools for councils to manage community assets now and into the future.

Are there programs or initiatives that the Commonwealth Government could adopt to improve the long-term sustainability of council's infrastructure?

Are there programs or initiatives that the Commonwealth Government could provide to improve the sector's capacity to manage local government infrastructure and to integrate these plans into long-term financial plans?

3. Community Wellbeing

While the NSoA focuses attention on physical assets, local governments also provide a wide range of important community services that improve local wellbeing. These services are provided at the discretion of councils based on local characteristics, needs, priorities and resources of the local community.

Australian Bureau of Statistics (ABS) data shows that local government annual expenditure in 2020/21 was \$43 billion. It is important to note that nationally local government is 83 percent self-sufficient. That is, the vast majority of local government services and infrastructure are funded at the local level either through rates, fees and charges, sale of goods and services, and interest, and only 17 percent comes from grants and subsidies from other levels of government. Unfortunately, many of these grants and subsidies are tied, and often require matching funding which restricts the ability to address local priorities in the way the council and community might like.

Local government community services are broadly defined and may include but not limited to:

- environmental health including food safety;
- childcare, early childhood education;
- aged care, senior citizens;
- services to the disabled;
- programs to address disadvantage, to reduce poverty and homelessness;
- sporting and recreational programs;
- arts and cultural activities, program and festivals;
- tourism and economic development activities; and
- library services.

Councils also play a key role making places that are attractive and liveable for current and future workers, and closing the gap between Indigenous and non-Indigenous Australians.

ALGA's research shows that almost one in four councils are heavily reliant on federal Financial Assistance Grants, which make up at least 20 percent of their annual operating revenue. Financial sustainability of local governments remains an ongoing issue which threatens local service provision and community wellbeing.

Noting the funding arrangements for the provision of local government community services in your area and across the country, are there programs and initiatives that the Commonwealth Government could implement to improve the delivery of these services?

Are there changes to existing programs, including to administrative arrangements, that would significantly improve local government human service planning and provision of services and infrastructure across Australia?

Are there new programs the Australian Government could develop that would support councils to close the gap between Indigenous and non-Indigenous Australians?

What are the actions the Australian Government could take to support councils to improve their ongoing financial sustainability, and their capacity to deliver the services their communities need?

4. Local Government Workforce

Local government is a major employer in Australia providing employment, career advancement and training opportunities for more than 190,800 Australians, across an estimated 400 occupations. In many communities, the council is one of the largest employers.

There are 537 local councils in Australia. Importantly, they are geographically dispersed and provide essential public administration to every corner of the nation.

According to the 2022 National Local Government Workforce Skills and Capability Survey, more than 90 percent of local governments are experiencing skills shortages, resulting in around two thirds of councils having their projects impacted or delayed.

Skills shortages occur for a variety of reasons including an inability to compete against the private sector, worker accommodation, support services for families, ageing of the workforce and geographic isolation. The attrition rate (or rate of turnover) of local government staff is estimated to be between 15 – 20 percent per annum.

The most cited skills shortages include engineers, urban planners, building surveyors, environmental officers and human resources professionals.

ALGA's submission to the Productivity Commission's Productivity Inquiry called on all levels of government to work together to improve training pathways and address skills and labour shortages for the benefit of councils, communities, and businesses right across Australia.

While local government must face its immediate workforce challenges, it must also anticipate the changing nature of work, and future skills needed to meet the changing needs of our communities.

Are there programs or initiatives that the Commonwealth Government could implement that would enhance local government's capacity to attract and retain appropriately skilled staff now and into the future?

Are there programs or changes to existing programs that would increase local government's ability to employ apprentices and trainees?

Are there other initiatives that the Commonwealth Government could provide to improve the sector's ability to plan and develop skills fit for the future?

5. Data, Digital Technology and Cyber Security

Provision of information technology to all Australians is vital for innovation, economic growth and social equity. However, it is potentially even more important to regional Australia where the tyranny of distance increases the inequity of services available – including education, health, economic and social.

Innovative technology is becoming more broadly available and has the ability to boost productivity and economic growth.

Councils around Australia continue to embrace new technologies to improve their service delivery standards and broaden consultation and engagement with their local communities. However, many councils lack basic technological infrastructure and have a shortage of necessary skills and resources.

In October 2022, cyber-attacks on major Australian corporate organisations including Optus and Medibank Private highlighted the critical importance of cyber security. It is a timely reminder as digital information, services and products become an increasing feature of modern business operation including in local government.

Like all risks, local government must manage the risk of cyber-attack and address cyber security. At a national level, there is a poor understanding of local government's vulnerability to cyber-attacks and a lack or inadequacy of risk management strategies and business continuity planning within the sector. While this is primarily a responsibility of the sector itself, governments at all levels must work together to ensure that the public have confidence in government information management systems and its security.

Drawing upon your own council experience, and your knowledge of other councils within your state, or territory, are there programs and initiatives that the Commonwealth Government could implement to help local government develop its digital technology services and infrastructure and/or to improve cyber security within the sector?

6. Climate Change and Renewable Energy

Local governments are playing an important leadership role in addressing climate change, supporting a wide range of programs to lower the carbon footprint of their own business operations and in their local communities.

As a sector, local government is leading the debate for lowering carbon emissions, sourcing renewable energy, responding creatively to reduce greenhouse gas emissions from landfills, and facilitating the construction of green buildings and water sensitive design of cities and towns.

Councils also have a role to play supporting communities in transition, moving away from fossil fuels to new industries.

Pragmatically, local government has been at the forefront of addressing the impacts of climate change and adapting to reduce its environmental footprint. These impacts include an increased number of days with high temperatures, less rainfall and more droughts in southern Australia, less snow, more intense rainfall and fire weather, stronger cyclones, and sea level rise. These changes will increase stress on Australia's infrastructure and physical assets and natural ecosystems that are already threatened, and significantly affect agriculture, forestry, fisheries, transport, health, tourism, finance and disaster risk management.

At the 2022 NGA, there were five Strategic Motions and 15 associated motions debated concerning this issue. Councils are encouraged to review these motions on ALGA's website prior to developing new motions for debate at the 2023 NGA.

Noting the Government's commitment to reducing emissions, are there programs and initiatives that the Commonwealth Government could develop to assist councils in their work to address climate change and reduce emissions?

7. Natural Disasters

Over the past five years, Australian communities have experienced unprecedented natural disasters. At the time of writing, almost every community in Australia, particularly those on the East Coast, had been adversely affected by wet weather conditions associated with the La Nina weather pattern.

Councils in Western Australia are still recovering from a cyclone in 2021, and the Black Summer bushfires in 2019/20 burned approximately 250,000 square kilometres across the country.

The impacts of heavy rainfall, record breaking floods and associated social disruption and damage to infrastructure have exposed weaknesses as well as the strength of current emergency management systems.

There have been numerous NGA motions in the past regarding natural disasters. This year, councils are encouraged to draw on their practical experience of the improvements that could be made to managing emergencies.

Please note, however, that many aspects of emergency management are state or territory responsibilities, and your motions should focus on how the Commonwealth Government could assist.

What new programs could the Australian Government develop to partner with local government to improve the current natural disaster management systems to further assist in recovery and build resilience?

8. Housing

A lack of affordable housing remains one of the biggest issues for Australian councils and communities.

There is less social and affordable housing stock available than there was a decade ago, and more low-income Australians are experiencing housing stress.

The shortage and rising costs of rental properties and affordable home ownership are having significant social and economic impacts in cities and towns across Australia, including rural and regional communities.

This is due to a range of factors including changes to recent migration patterns, cheap finance and labour and material shortages in the construction sector.

While the provision of affordable housing is not a local government responsibility, councils often facilitate affordable housing within their communities, operating within state/territory planning, financial and other legislation requirements.

Some councils are going further, addressing thin markets and developing land and housing themselves, delivering local solutions to meet the needs of their communities.

Local government also plays an important role addressing some of the causes of homelessness, including social inclusion programs that can assist mental health and family violence issues, as well as providing support for people currently experiencing homelessness.

What new programs and policies could the Australian Government develop to partner with local government to support the provision of more affordable housing?

How can the Australian Government work with councils to address the causes and impacts of homelessness?

Conclusion

Thank you for taking the time to read this discussion paper and your support for the 2023 National General Assembly of Local Government.

A FINAL REMINDER:

- » Motions should be lodged electronically at www.alga.com.au and received no later than 11.59pm on Friday 24 March 2023.
- » Motions must meet the criteria published in this paper.
- » Motions should commence with the following wording: 'This National General Assembly calls on the Australian Government to...'
- » Motions should not be prescriptive in directing how the matter should be pursued
- » Motions should be practical, focussed and relatively simple.
- » It is important to complete the background section on the form.
- » Motions must not seek to advance an outcome that would result in a benefit to one group of councils to the detriment of another.
- » When your council submits a motion there is an expectation that a council representative will be present at the 2023 National General Assembly to move and speak to that motion if required.

We look forward to hearing from you and seeing you at the 2023 National General Assembly in Canberra.
