13.02.2026

Works commencing at the Youth Precinct as part of Council's ongoing improvements to community spaces

The construction of new public toilets and a covered BBQ area, at the Youth Precinct will begin the week commencing, Monday 16 February 2026, significantly improving amenities for youth and other people enjoying the excellent facilities in the park.

The location of the toilets has been carefully considered to ensure they are:

- Close to the skate park, walking tracks and BBQ area
- Able to connect to existing underground services
- Within planning constraints, including an Aboriginal land claim in the area

To allow these facilities to be built in the most practical location, one tree will unfortunately need to be removed. Council understands the value of trees in our community spaces and this decision was not taken lightly. Additional trees will be planted once the construction project has been finished.

Youth and public are requested to please not enter the construction site during the constructed period. Council is committed to providing essential facilities while keeping the park safe, accessible and enjoyable for everyone.

We are all indeed looking forward to sharing with you the final reveal in the not too distant future!
